ALLOWANCE

1. Claims 1, 7-15, 21-29, and 35-42 allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior art of record fails to teach or suggest the claimed invention individually or in combination the limitation of determining that the second child node represents the constant 0 and that the parent node represents an arithmetic operation selected from the group consisting of addition and subtraction; and in response, removing the parent node and its children from the tree structure and inserting the first child node in its place, as set forth in claims 1, 15, and 29.
4. The closest prior art, Paulley et al. in view of Warner et al., discloses an improved normalization methodology enabling better optimization of SQL queries is described using operator trees. However, the prior art does not teach or suggest the limitations cited above as being free of any prior art when read in the claims as a whole.

CONCLUSION

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
